Date Released: January 2012

Montréal Metropolitan Area Housing Starts in December 2011

The latest starts survey conducted in December 2011 by Canada Mortgage and Housing Corporation (CMHC) revealed that construction got under way on 2,005 housing units during that month in the Montréal census

metropolitan area (CMA), compared to 1,834 in December 2010.

Construction of condominiums continued to offset declines in starts of other housing types and supported home building in the Montréal CMA. Condominium starts reached 1,382 units in December 2011, a level that was higher than the 963 units recorded in December 2010. This was also the sixth month in 2011 where condominium construction surpassed 1,000 units.

Starts of all other housing types moved down. On the freehold housing side, detached home starts and new semi-detached and row houses decreased by 14 per cent and 8 per cent, respectively. Construction of rental housing¹ declined as well (-83 per cent).

In 2011, total annual starts in the Montréal CMA increased by 3 per cent and reached 22,719 units, as a result of a strong showing in the condominium segment. Condominium starts increased by 21 per cent to 12,681 units from the 10,457 units in 2010. Strong condominium starts since May 2011 boosted the annual level, which surpassed the previous peak reached in 2010. In 2011, condominiums accounted for the majority of the starts enumerated in the CMA. The share of condominium starts increased from 48 per cent in 2010 to 56 per cent in 2011.

Contrary to the strong showing in condominium starts, construction of detached homes declined by almost 20 per cent to 4,653 units and is now approaching the 1995 historical low of 3,818 units. Semi-detached and row housing starts decreased by about 9 per cent, and rental housing starts fell by 8 per cent.

On a submarket basis, the Island of Montréal was the only sector that posted a gain (+29 per cent), thanks to a 35-per-cent increase in condominium starts. In the North Crown, while condominium construction in Laval helped boost total starts of this type in this sector by 21 per cent, it was not strong enough to offset the decline in the freehold housing category. New home construction in the North Crown decreased by 3 per cent, as a result.

In the South Crown, despite a stable level of condominium starts, weaker construction of detached homes and rental housing led to a 14-per-cent decrease in total housing starts in this sector. In Vaudreuil-Soulanges, the 12-per-cent drop in housing starts was mostly due to a decline in detached home construction.

MLS® sales down for 2011

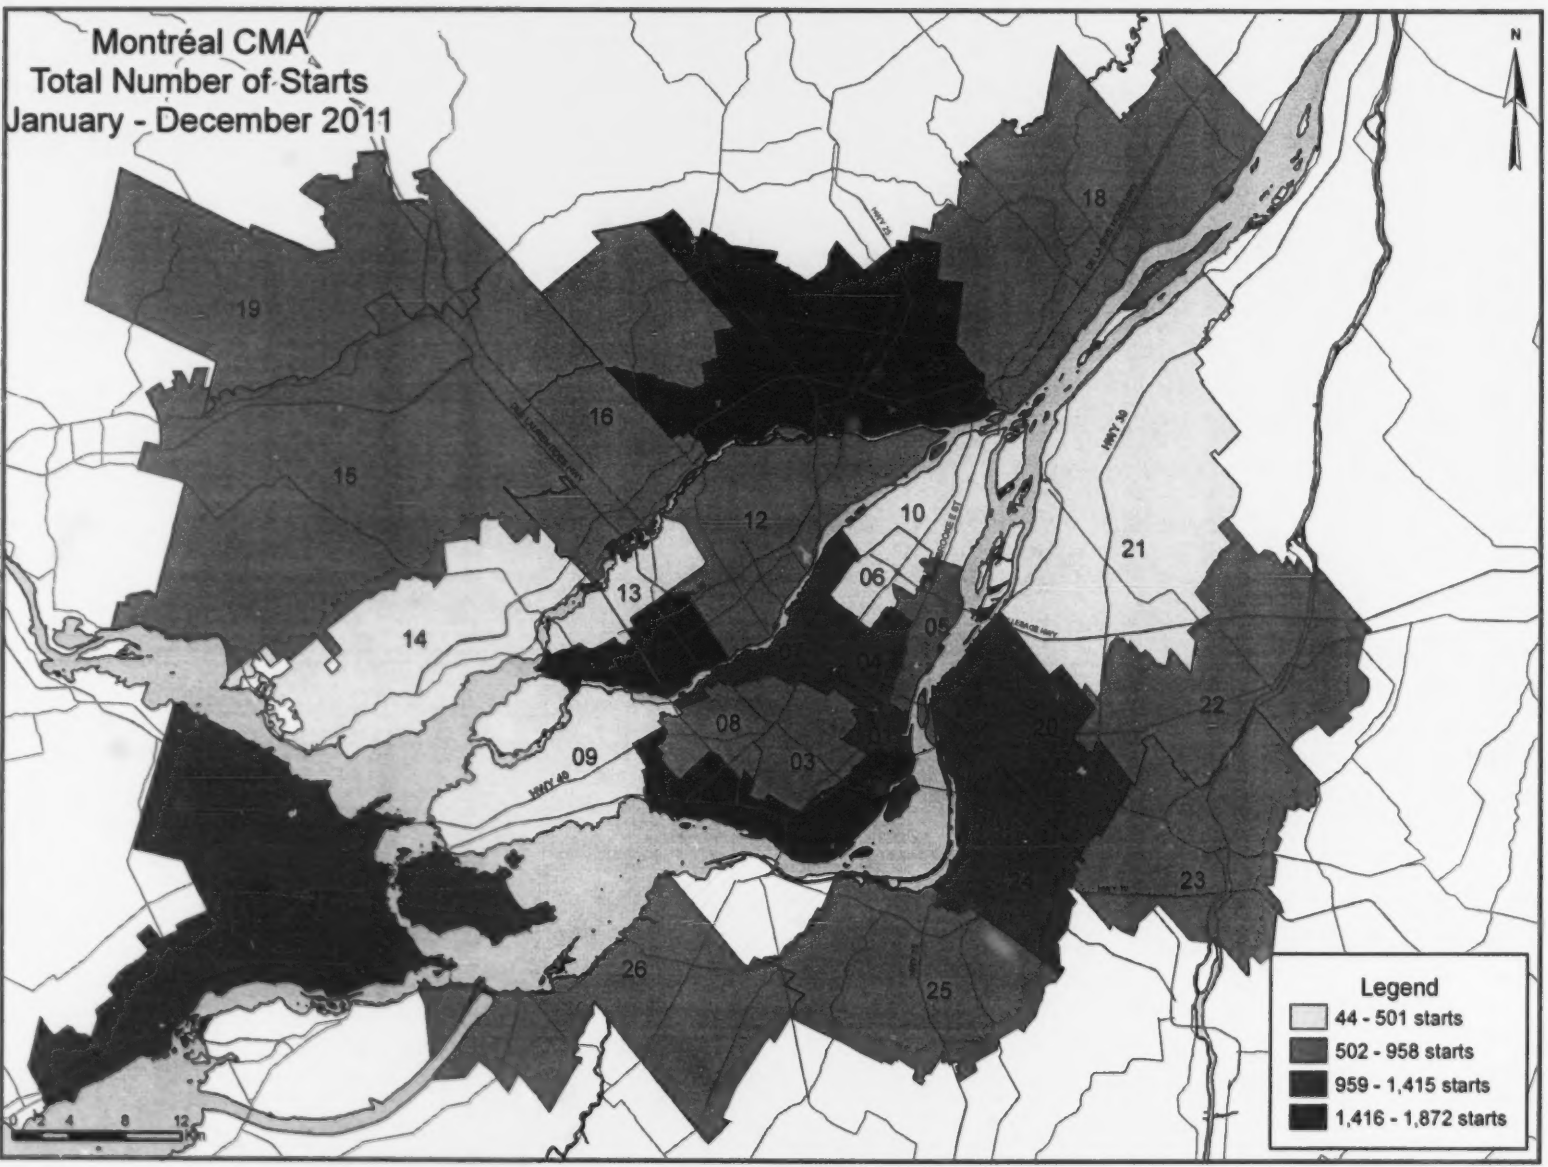

According to data from Quebec Federation of Real Estate Boards (QFREB), 8,853 MLS® sales were registered in the fourth quarter of 2011, or 4.9 per cent more than during the same period in 2010. After having slowed down at the beginning of 2011, the pace of transactions picked up during the second half of the year. As well, the number of listings continued to rise for a fifth straight quarter, with an increase of 14.2 per cent.

All in all, even though activity starting rising again in the last months of 2011, the year ended with a decrease in MLS® transactions (-4.5 per cent) compared to 2010. Condominium sales, however, partly offset the declines recorded in the other market segments, by posting a gain of 1.0 per cent. The single-family home and plex segments, for their part, saw their total numbers of MLS® transactions fall by 6.3 per cent and 9.6 per cent, respectively. In 2011, the resale market was mainly characterized by a strong resurgence in active MLS® listings, as they climbed by 15.8 per cent over the previous year. In fact, after having favoured sellers for several years, market conditions progressively moved closer to a more balanced level in 2011, thanks to this growth in supply. With the strongest increase in

active MLS® listings (+21.5 per cent), condominiums were the segment where market conditions eased the most significantly.

Consequently, the growth in prices was sustained in 2011, but more moderate than in 2010. In fact, the average MLS® price registered an increase of 5.5 per cent in 2011, compared to a hike of 8.3 per cent in 2010. This growth extended to all market segments, as average MLS® prices rose by 6.3 per cent for single-family houses, by 5.8 per cent for plexes and by 3.9 per cent in the case of condominiums.

¹ In this report, the data presented on the rental segment exclude co-operative housing starts.

ZONE DESCRIPTIONS - MONTRÉAL CMA

Zone 1	Downtown Montréal (bordered on the east by Amherst Street, on the west by Guy Street and on the north by Chemin Remembrance and Des Pins Avenue), Île-des-Soeurs.
Zone 2	Dorval, L'Île-Dorval, Montréal (Lachine, LaSalle, Le Sud-Ouest, Verdun).
Zone 3	Côte-Saint-Luc, Hampstead, Montréal (Côte-des-Neiges, Notre-Dame-de-Grâce, Outremont), Montréal-Ouest, Mont-Royal, Westmount.
Zone 4	Montréal (Parc-Extension, Plateau Mont-Royal, Rosemont (including La Petite-Patrie), Saint-Michel, Villieray).
Zone 5	Montréal (Mercier, Hochelaga-Maisonneuve, Centre-Sud).
Zone 6	Montréal (Anjou, Saint-Léonard).

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "under construction" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A **"Single-Detached"** dwelling (also referred to as **"Single"**) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A **"Semi-Detached (Double)"** dwelling (also referred to as **"Semi"**) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **"Row (Townhouse)"** dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term **"Apartment and other"** includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The **"intended market"** is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A **"Rural"** area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
